Description

When a user enters an XSS script tag into the search field and submits the query, the server returns a 503 Service Unavailable error instead of displaying empty results or a "no results found" message. The page becomes completely unavailable. STEPS TO REPRODUCE: 1. Open https://epicentrk.ua 2. Click on the search field in the header 3. Enter the following text: <code><script>alert(1)</script></code> 4. Press the search button or hit Enter EXPECTED RESULT: Search returns empty results or displays a "Nothing found" message. The script is not executed. Page remains available. ACTUAL RESULT: Server returns 503 Service Unavailable error. The page is completely unavailable. The XSS input is visible in the URL bar as an encoded string.
