Description

When a user enters a very long string (200+ characters) into the search field, the search results page displays the full query as oversized bold text spanning the entire page width. This breaks the UI layout and negatively impacts user experience.

STEPS TO REPRODUCE:

1. Open <https://epicentrk.ua>
2. Click on the search field in the header
3. Enter 200+ random characters:
іфввадамтоаоальсаоаллвлъатвооладвжсжажвддадвддавооравоосавббббвллвллвллвллаллааллааллааллттці
4. Press the search button or hit Enter

EXPECTED RESULT:

The search query is displayed in a normal readable font size, or is truncated with "..." if too long. The page layout remains intact.

ACTUAL RESULT:

The full search query is rendered as oversized bold uppercase text spanning the entire page width, breaking the UI layout. The text overflows and is not truncated.
